

ERNESTO VALECILLOS

Front End Web Developer

SUMMARY

Hardworking and flexible developer with a passion for researching efficient solutions to complex situations. From management and IT hardware, soft skills and curiosity have served me well. Looking to bring my skills and curiosity to a tech company and further sharpen my skills.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

Jan 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured full stack web applications.
- Applied agile methodologies like SCRUM for project management.

Recent Projects:

Spoiler-Alert | Message board that requires users to be logged in to read spoilers on a given movie/show

- Back-end dev for a team of 4. Focused on database management & models and connecting to the front-end.
- Tools: JavaScript, Node.js, Sequelize, MySQL, Express.js, Handlebars, Bootstrap.

Shop-Shopdux | Single page web application that also stores data if user is offline to enhance user experience.

- React application built first using Context API, then refactored to use Redux instead.
- Tools: React, Redux, Apollo Client, Stripe API, IndexedDB.

Other Projects: GG Budget tracker, VZ management command-line based staff tracking application, On-demand background color changer for Partnered Twitch streamer, and more.
